SUMMARY

Full-stack developer with 5+ years building production web, mobile, and AI-driven applications across React, Next.js, ASP.NET Core, and Node. At Cathedral Plumbing, built an internal portal used by 7 construction companies and three mobile apps adopted by 3,000+ field technicians, shipping on a two-week release cycle. Completed the Gauntlet AI fellowship and has taught AI-engineering curriculum to about 20 working software engineers.

PROFESSIONAL EXPERIENCE

Soledad Data Solutions | *San Diego, CA (Remote)* Jan 2026 – May 2026
AI Instructor

- Designed and delivered a hands-on AI engineering curriculum to about 20 practicing software engineers across two cohorts of about 10 weeks each, covering how to design, build, and ship AI-first and agentic applications.
- Led instruction on modern AI development workflows — LLM APIs, agent orchestration, automation, and prompt engineering — turning fast-moving practices into structured, repeatable lessons.

Gauntlet AI | *Austin, TX* Oct 2025 – Dec 2025
AI Engineering Fellow

- Engineered RapidPhotoUpload, a Spring Boot and React media platform with resumable chunked uploads, cutting bulk upload of 1,000 images from roughly 15–20 minutes to 2–3.
- Built a growth-focused Varsity Tutors MVP in Next.js 14 with gamified social learning loops, agent-based personalization, and K-factor analytics.
- Built and shipped multiple full-stack AI products end-to-end, including CollabCanvas (real-time collaborative design with GPT-4o generation), MessageAI (GPT-powered iOS messaging with semantic search), and ClipForge (an Electron video editor with Whisper transcription).
- Contributed to Chartsmith, Replicated's AI-powered Helm chart tool, working across a TypeScript, Go, and Kubernetes codebase.

Cathedral Plumbing | *Carrollton, TX* Aug 2022 – May 2025
Full Stack Developer (16-person team)

- Built and maintained an internal web portal (React.js and ASP.NET Core) used by 7 construction companies to run core operational workflows and day-to-day field operations.
- Designed and shipped three production mobile apps — MiTrade, MiDia, and MiDay — adopted by 3,000+ field technicians for access to job-critical tools and information.
- Expanded unit and integration test coverage with Jest, catching regressions earlier and improving release stability across production deployments on a two-week release cycle.
- Improved microservice response times, query times, and error rates by optimizing service-to-service communication and database interactions, with added monitoring and logging for faster troubleshooting.

Risk and Safety Solutions | *Davis, CA* Oct 2020 – Apr 2022
Project Coordinator / Web Developer

- Joined as a contract web developer building React.js and CSS features for an internal portal, then transitioned into a full-time project coordination role.
- Drove Agile delivery through sprint planning, progress tracking, blocker resolution, and stakeholder communication across engineering teams.

Orbees Business Solutions | *Fremont, CA* Jun 2019 – Oct 2020
Frontend Developer

- Built an internal timesheet and leave-management portal, and maintained Orbees' internal applications and websites — HTML, JavaScript, CSS.

TECHNICAL SKILLS

Frontend: React.js, Next.js, React Native, SwiftUI, Redux, Tailwind CSS, Zustand
Backend & APIs: Node.js, Express.js, ASP.NET Core, Spring Boot, REST, GraphQL, Entity Framework Core
Languages: TypeScript, JavaScript, Python, C#, Java, Bash, HTML5, CSS3
Databases & Cloud: PostgreSQL, MongoDB, SQL, Firebase, AWS, Azure, GCP, Cloudflare R2
DevOps & Testing: Docker, Kubernetes, Terraform, GitHub Actions, CI/CD, Jest, Cypress, Postman
AI & Automation: OpenAI, Claude, Gemini, LangGraph, LangChain, n8n, Whisper

EDUCATION

Arizona State University — B.A. in Economics
BloomTech — Full Stack Development Training
